

This Environmental statement recognises that Marine Civil Contractors Pty Ltd is committed to and responsible for minimising the impact of its activities on the environment. MCC is committed to the prevention of pollution.

MCC operations include: Commercial diving operations, vessel salvage, maritime construction and maintenance, navigational aids, harbour facilities construction and demolition activities.

To meet the objectives of this statement, MCC is committed to ensuring that all levels of management and employees have a clear understanding of their obligations towards protecting and sustaining the environment.

MCC will achieve this by:

- Understanding the environmental aspects and impacts of our activities
- Minimising waste by evaluating operations and ensuring they are efficient as possible
- Actively promoting recycling, internally and amongst our clients and suppliers
- Meeting and/or exceeding all environmental legislation and regulation that relates to the task/works being performed
- Obtaining the relevant permits required for the works to be performed
- Ensuring continual improvement in environmental performance
- Ensuring that all staff and contractors are aware of the expectations placed upon them
- Ensure to promote environmentally sustainable work practices

Management seeks full co-operation from **all** employees in achieving our Environmental Sustainability objectives and targets.
